SUMMARY

Enterprise Architecture professional with hands-on experience in SAP S/4HANA-led transformation programs. Specialises in end-to-end business process design, cross-module impact analysis, and architecture documentation. Brings a blend of technical depth — SAP ABAP, BTP, Signavio — and strong process thinking to bridge business and technology teams effectively. Actively exploring AI and LLM development, with hands-on work using the Claude API, prompt engineering, and AI-powered automation.

WORK EXPERIENCE

Packaged App Development Associate | Accenture

March 2024 – Present

- Design and align end-to-end business scenarios across multiple workstreams, consolidating L4/L5 process steps into structured integration testing flows.
- Build current-state and target-state architecture views, conducting cross-module impact analysis to support SAP S/4HANA transformation planning.
- Develop and deliver customised Adobe Forms and SAP ABAP solutions within S/4HANA environments, aligned to business and compliance requirements.
- Bridge business, functional, and technical stakeholders to translate complex enterprise requirements into structured SAP solutions.

Junior Software Engineer Intern | Sanhar ABS

Dec 2022 – Aug 2023

- Designed and optimised Oracle and PL/SQL queries for complex database management tasks, improving data retrieval performance.
- Built operational dashboards, data entry forms, and reporting components, increasing team visibility into key business metrics.
- Supported PMO activities and cross-functional coordination, gaining early exposure to project governance and delivery practices.
